

# ARCTIC XTREME™ COLD STORAGE LABELS

Arctic Xtreme™ labels feature a freezer-grade, hybrid all-temp adhesive specially formulated for cold storage environments to allow for application at temperatures as low as -20F.

## Xtreme Performance

Arctic Xtreme™ labels set a new industry standard for cold storage labeling.

ID Label's innovative freezer-grade, hybrid adhesive is designed to resist moisture and frost build-up while maintaining a permanent bond to metal warehouse racking at service temperatures as low as -65F.

And because Arctic Xtreme™ labels can be installed at temperatures as low as -20F, you won't disrupt your operations installing them. There's no need to move your freezer inventory and raise the temperature to accommodate labeling or relabeling your racks.

## Xtreme Value

Arctic Xtreme™ labels feature the industry's most advanced permanent adhesive, so you won't have to worry about peeling or cracking. And, unlike magnet-backed labels, they won't get misplaced or knocked to the floor.

They also feature a durable, laminated top coating for added protection from warehouse bumps and knocks, including our ultra-durable BullsEye™ construction. As a custom manufacturer, ID Label can design your Arctic Xtreme labels in custom sizes and colors featuring linear or 2D barcoding.
